Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 492, 1 February 2003

Part I

Sediment–Water Interaction 13

Edited by

H. L. Golterman

Guidelines for authors for the sediment issues of *Hydrobiologia* 3–4

A test of normalization methods for marine sediment, including a new post-extraction normalization (PEN) technique
Gavin F. Birch 5–13

Phosphorus in settling matter and bottom sediments in lakes loaded by agriculture
Kirsti Krogerus, Petri Ekholm 15–28

Determining algal-available phosphorus of differing origin: routine phosphorus analyses versus algal assays
Petri Ekholm, Kirsti Krogerus 29–42

Pore water nutrient profiles and dynamics in soft bottoms of the northern Baltic Sea
Kalervo Mäkelä, Liisa Tuominen 43–53

Binding of phosphate in sediment accumulation areas of the eastern Gulf of Finland, Baltic Sea
Jouni Lehtoranta, Heikki Pitkänen 55–67

Dissolved iron:phosphate ratio as an indicator of phosphate release to oxic water of the inner and outer coastal Baltic Sea
Jouni Lehtoranta, Anna-Stiina Heiskanen 69–84

The distributions and effects of nutrients in the sediments of a shallow eutrophic Chinese lake
Fu-Liu Xu, S. Tao, R. W. Dawson, Z. R. Xu 85–93

Sediment phosphate fractionation and interstitial water phosphate concentration in two coastal lagoons (Albuferas de Adra, SE Spain)
I. de Vicente, L. Serrano, V. Amores, V. Clavero, L. Cruz-Pizarro 95–105

Particle size-related phosphate binding and P-release at the sediment–water interface in a shallow German lake
Uwe Selig 107–118

Inorganic nutrient and oxygen fluxes across the sediment–water interface in the inshore macrophyte areas of a shallow estuary (Lake Illawarra, Australia)
Wenchuan Qu, R. J. Morrison, R. J. West 119–127

Phosphorus distribution in sediments of Morales Stream (tributary of the Matanza-Riachuelo River, Argentina). The influence of organic point source contamination
Ana Rosa García, Alicia F. de Iorio 129–138

Effects of aluminum, iron, oxygen and nitrate additions on phosphorus release from the sediment of a Danish softwater lake
Jonas Hansen, Kasper Reitzel, Henning S. Jensen, Frede Ø. Andersen 139–149

Influence of nitrogen species (NH_4^+ and NO_3^-) on the dynamics of P in water–sediment–*Salvinia herzogii* systems
M. C. Panigatti, M. A. Maine 151–157

Variability of the sediment phosphate composition of a temporary pond (Doñana National Park, SW Spain)
L. Serrano, I. Calzada-Bujak, J. Toja 159–169

Concentrations of heavy metals and related trace elements in some Ethiopian rift-valley lakes and their in-flows
G. M. Zinabu, Nicholas J. G. Pearce 171–178

Part II
Salt Ecosystems Section

Edited by
John M. Melack & Patrick Sorgeloos

The contribution of size-fractionated plankton to biomass and primary production of phytoplankton in saline–alkaline ponds
Zhao Wen, Dong Shuang-Lin 181–190

Effects of salinity and temperature on reproductive and life span characteristics of clonal *Artemia*. (International Study on *Artemia*. LXVI)
Theodore J. Abatzopoulos, Nagy El-Bermawi, Christos Vasdekis, Athanasios D. Baxevanis, Patrick Sorgeloos 191–199

Influence of high salinity and nitrogen limitation on package effect and C/N ratio in *Dunaliella viridis*
C. Jiménez, F. X. Niell 201–206

Instructions for authors 207–209
